

▶ Ice-cube design  
 ✓ Hollow cone

▶ Max. production: 50 kg/24 hrs  
 ▶ Produced using: Paddle system

▶ Storage container capacity: 13 kg

▶ Includes  
 ✓ Ice shovel

▶ Important note  
 ✓ At least 10 cm clearance required on all sides

C series ice-cube machine: Hollow cones using a paddle system. Up to 50 kg of ice cubes can be produced within 24 hours - very easily via a permanent water connection.

- |                                    |   |                           |                          |
|------------------------------------|---|---------------------------|--------------------------|
| • Water outlet:                    | Ø 21 mm   | • Production by means of: | Paddle system            |
| • Design ice cube:                 | Tapered form (hollow taper)   | • Size:                   | W 547 x D 610 x H 823 mm |
| • Ice cube size:                   | Ø 29 mm, height 40 mm, 19-21 g  | • Weight:                 | 38.4 kg                  |
| • Production / work step:          | 24 Ice cubes  |                           |                          |
| • Number of ice cube sizes:        | 1   |                           |                          |
| • Power load:                      | 0,38 kW   230 V   50 Hz   |                           |                          |
| • Properties:                      | -   |                           |                          |
| • Control lamp:                    | ON/OFF<br>In operation<br>Low water level<br>Fault<br>Storage tank full |                           |                          |
| • ON/OFF switch:                   | Yes   |                           |                          |
| • Control unit:                    | Knob  |                           |                          |
| • Can be fitted below the counter: | No  |                           |                          |
| • Can be installed:                | No  |                           |                          |
| • Water connection:                | 3/4"  |                           |                          |
| • Climate class:                   | ST  |                           |                          |
| • Coolant:                         | R290 / 0,055 kg   |                           |                          |
| • Cooling:                         | Air cooled  |                           |                          |
| • Filling level sensor:            | Yes   |                           |                          |
| • Storage container capacity:      | 13 kg   |                           |                          |
| • Production max.:                 | 50 kg / 24 h  |                           |                          |
| • Colour:                          | Silver  |                           |                          |
| • Including:                       | 1 ice shovel  |                           |                          |
| • Material:                        | Stainless steel   |                           |                          |
| • Important information:           | Clearance to all sides at least 10 cm                                   |                           |                          |
