

Deep Fryer XL Profi Line with drain tap, 10 l, 400 V

209424

Profi Line deep fryers are made of 18/0 stainless steel. Removable control element with an additional safety feature that switches off the fryer heater when it is removed. The grease container has a V-shaped bottom with an optimal "cold zone" for increased grease yield. Easy to read control panel with temperature control knob and indicator light. Overheating protection thanks to a resettable thermal fuse. Deep frying basket with extra-long, cool-touch handle for intensive use. All deep fryers are equipped with 1 deep frying basket and 1 lid for each chamber.

Very powerful 400V deep fryer, allows the heating element to use up to 6600W of power. Reduces the temperature recovery time after inserting frozen food, resulting in crispier food. Supplied without plug, an electrician is required for the installation.
