Sound level meter SAUTER SW

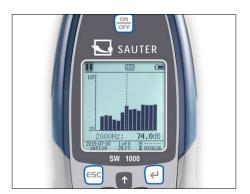

First-class professional Class I, Class II sound level meter

Data logging function with date and time in the device...

... and data transfer using MicroSD (4G) memory card (included in delivery), RS-232 or USB

Different sound pressure levels can be selected, such as, Laeq, LcPeak, LaF, LaFMax, LaFMin, SD, SEL, E

SAUTER CATALOGUE 2021

Sound level meter SAUTER SW

Features

- Ideal for measurements for workplaces outdoor, e.g. at airports, on building sites, in road traffic etc. with broad access to spectrum thanks to the highly-accurate 24-Bit A/D converter
- Floating point evaluation for higher level of accuracy and better stability
- The optimised analogue frontend switch reduces the ambient noise and increases the linear measuring range
- A specially-developed algorithm permits a compliant dynamic range of more than 120 dB! (SW 1000: > 123 dB; SW 2000: > 122 dB)
- Three profiles and 14 user-defined measurements can be calculated in parallel with different frequency and time weighting
- LN statistics and display of the graph showing the progression of time
- User-defined integral interval measurement up to a maximum of 24 hours is possible
- Frequency weighting (filter) A, B, C, Z
- Time interval during measurement: F (fast),
- S (slow), I (pulse)Freely-definable limits for the output of an optical alarm signal
- Peak hold function to capture the peak value
- Octavo function for targeted sound analysis
- TRACK function with graphic display of a measurement

- Calibration mode (with optional calibrator)
- Trigger mode: external start/stop of measurement via 3.5 mm connector
- Automatic measurement for timer function is possible
- Selectable frequency for recording measurements: 10, 5, 2 Hz
- Operating languages: GB, DE, FR, ES, PT
- II Delivery in robust transport case
- Option of fitting a stand on the rear of the housing, 1/4" thread

Technical data

- Applicable standards: IEC61672-1:2014-07 GB/T3785.1-2010
- 1/1 Octave in accordance with IEC 61260:2014
- ½" microphone
- Permissible ambient temperature range -10 $^{\circ}\text{C}/50$ $^{\circ}\text{C}$
- Output (direct or alternating current) AC (max 5 VRMS), DC (10 mV/DB)
- Mains operation as standard
- Battery operation, 4× 1.5 V AA, not included, operating time up to 10 h
- Dimensions W×D×H 80×36×300 mm
- Net weight approx. 400 g

Accessories

- Plug-In for data transfer of measuring data from the measuring instrument and transfer to a PC, e.g. in Microsoft Excel[®], SAUTER AFI-1.0
- Stand, W×D×H 430×90×90 mm, 1250×750×750 mm (moved out), SAUTER SW-A05
- SD-memory card, storage capacity 4 GB, SAUTER SW-A04
- Foam windshield, SAUTER SW-A03
- Calibrator for regular adjustment of the sound level meter, class 1, as well as testing the linearity of sound level meters
 - Applicable standards: IEC60942:2003 Class 1, ANSI S1.40-1984, GB/T 15173-1994.
 - Output frequency 1 kHz (+/- 0,5 %)
 Output of acoustic pressure, can be
- selected at 94 dB or 114 dB (± 0.3 dB)
- Distortion factor < 2 %
- Stabilisation time < 10 s
- Permissible ambient temperature range
 -10 °C/50 °C
- The calibrator is designed for 1/2" as well as 1/4" microphones (adapter included in the delivery) in accordance with the IEC 61094-4 standard
- Battery operation, 2× 1.5 V AA, not standard, operating time up to 40 hours
- Dimensions W×D×H 70×70×48 mm
- Net weight approx. 137 g
- SAUTER BSWA-01
- Factory calibration certificate for calibrator, SAUTER 961-291
- DAkkS-Calibration certificate for calibrator, SAUTER 963-291

SAUTER CATALOGUE 2021

Pictograms

Adjusting program (CAL): For quick setting of the instrument's accuracy. External adjusting weight required

Calibration block: Standard for adjusting or correcting

the measuring device

Peak hold function: PEAK

Capturing a peak value within a measuring process

Scan mode: Continuous capture and display of measurements

tension and compression forces

Length measurement: Captures the geometric dimensions of a test

FOCUS

Focus function:

Increases the measuring accuracy of a device within a defined measuring range

Internal memory:

To save measurements in the device memory

Data interface RS-232:

Bidirectional, for connection of printer and PC

Profibus:

For transmitting data, e.g. between scales, measuring cells, controllers and peripheral devices over long distances. Suitable for safe, fast, fault-tolerant data transmission. Less susceptible to magnetic interference.

Profinet:

Enables efficient data exchange between decentralised peripheral devices (balances, measuring cells, measuring instruments etc.) and a control unit (controller). Especially advantageous when exchanging complex measured values, device, diagnostic and process information. Savings potential through shorter commissioning times and device integration possible

Data interface USB:

To connect the measuring instrument to a printer, PC or other peripheral devices

℅

Bluetooth* data interface: To transfer data from the balance/measuring

instrument to a printer, PC or other peripherals

ZERO: Resets the display to "0"

Battery operation:

Ready for battery operation. The battery type is

specified for each device

Rechargeable set

230 V

230V/50Hz in standard version for EU. On request GB, AUS or USA version available

Power supply:

Integrated, 230V/50Hz in EU. More standards e.g. GB, AUS or USA on request

Motorised drive: The mechanical movement is carried ELECTRO out by a electric motor

Motorised drive:

The mechanical movement is carried out by a synchronous motor (stepper)

Μ

Fast-Move:

The total length of travel can be covered by a single lever movement

Verification possible:

The time required for verification is specified +3 DAYS in the pictogram

DAkkS calibration possible:

The time required for DAkkS calibration is shown in days in the pictogram

ISO +4 DAYS

Factory calibration: The time required for factory calibration is specified in the pictogram

Package shipment: The time required for internal shipping

preparations is shown in days in the pictogram

Pallet shipment:

The time required for internal shipping preparations is shown in days in the pictogram

Your KERN specialist dealer:

It is a standardized interface command set for KERN balances and other instruments, which allows retrieving and controlling all relevant parameters and functions of the device. KERN devices featuring KCP are thus easily integrated with computers, industrial controllers and other digital systems

For connecting the scale/measuring instrument

GLP/ISO record keeping:

Of measurement data with date, time and PRINTER serial number. Only with SAUTER printers

WLAN data interface:

Data interface Infrared:

To connect relays, signal lamps,

To transfer data from the balance/measuring

instrument to a printer, PC or other peripherals

To transfer data from the measuring instrument

to a printer, PC or other peripheral devices

Control outputs (optocoupler, digital I/O):

To connect a suitable peripheral device for

analogue processing of the measurements

For output of an electrical signal depending

Using the saved values, the device

calculates statistical data, such as

To transfer the measurement data

to print out the measurement data

from the device to a PC

Network interface:

to an Ethernet network

average value, standard deviation etc.

A printer can be connected to the device

on the load (e.g. voltage 0 V - 10 V or current
